Thu May 25 19:01:08 2023 +0800 W15-P1: prepare menu items for API project in Vercel

## W15-P2: get menu items from local json (products.json)

The screenshot displays a development environment with Visual Studio Code on the left and a web browser on the right. The browser shows a live preview of a furniture store website at the URL `127.0.0.1:5501/demo/w15-store-product/index.html`.

**Visual Studio Code (Left Panel):**

- The file explorer on the left shows a project structure with files like `index.html`, `app_42.js`, and `products.json`.
- The main editor shows the `app_42.js` file with the following code:

```
const fetchData = async () => {
  try {
    const response = await fetch(url1);
    const data = response.json();
    console.log('fetchData', data);
    return data;
  } catch (err) {
    console.log(err);
  }
}

const displayProducts = (products) => {
  let displayContent = products.map((product, index) => {
    const { company, name, price } = product.fields;
    let image = `./images/product-${index+1}.jpg`;
    console.log(image);
    return `
    <div class="single-product">
      
      <footer>
        <h5 class="name">${name}</h5>
        <span class="price">${price/100}</span>
      </footer>
    </div>
  `;
  }).join('');

  // console.log('displayContent', displayContent);
  pContainer.innerHTML = displayContent;

  window.addEventListener('DOMContentLoaded', async () => {
    allProducts = await fetchData();
    console.log('allProduct', allProducts);
    await displayProducts(allProducts);
  });
}
```

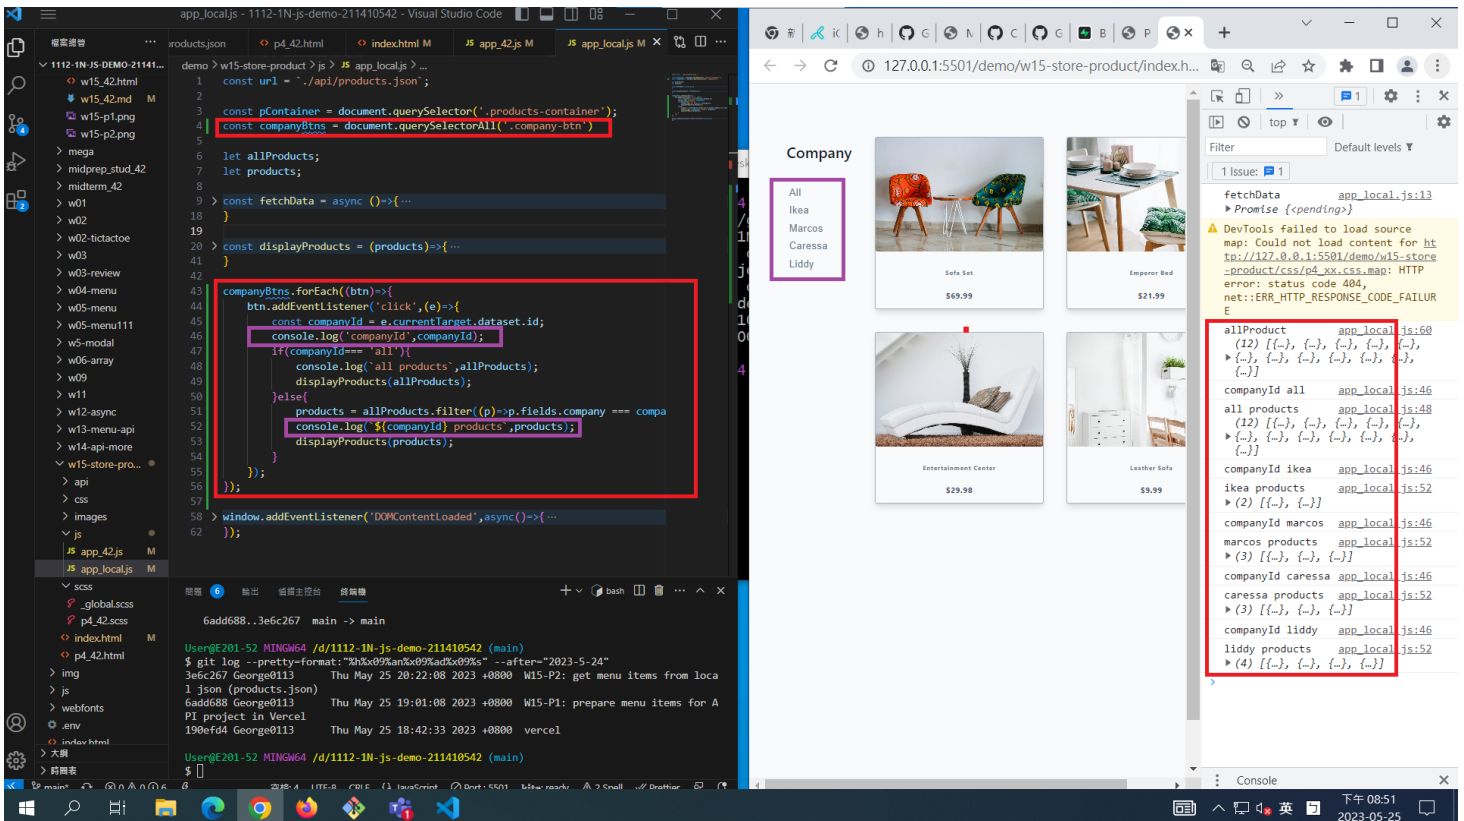

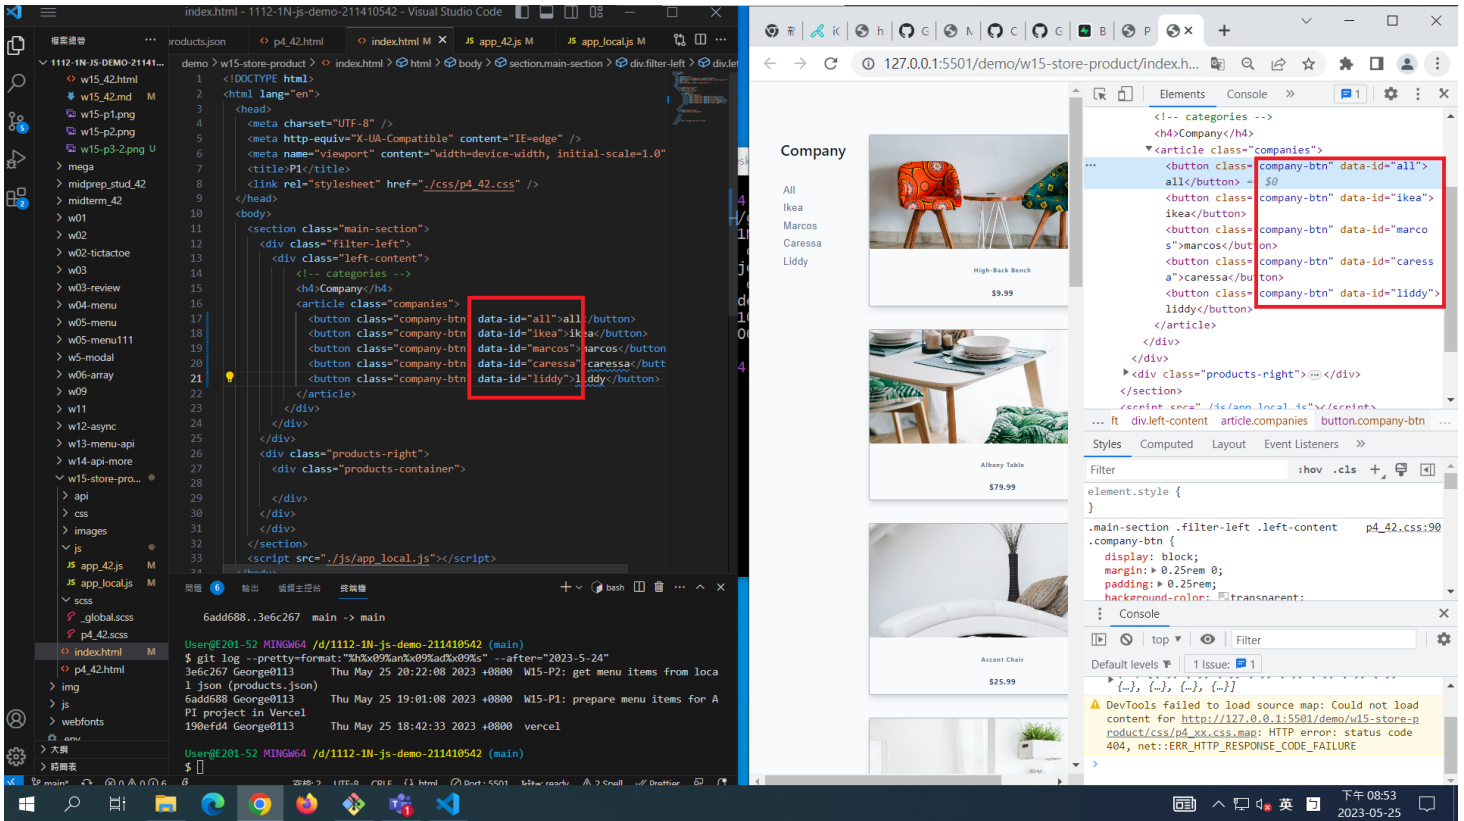

**Web Browser (Right Panel):**

- The browser displays a website with a header "Company" and a list of furniture items.
- The items shown are: High-back Bench (\$9.99), Albany Table (\$79.99), Accent Chair (\$25.99), Wooden Table (\$45.99), Dining Table (\$6.99), and Sofa Set (\$69.99).
- The right sidebar shows a "Filter" section with "Default levels" and a "1 Issue: 1" indicator.
- The bottom right shows the "Console" with a log message: `allProduct app_local.js:45`.
